

WHAT IS CLAIMED IS:

1. A cosmetics case which comprises:

a housing having an upper level and a lower level;

a cover pivotally mounted to the housing for closing the housing;

a cosmetic receptacle disposed on the upper level of the housing;

a cosmetic set receiving drawer disposed in the lower level of the housing; and

a locking and releasing member system operatively connected with the cover and the cosmetic set receiving drawer, whereby when the user pushes the locking and releasing member, the cover is opened and the cosmetic set receiving drawer is pushed simultaneously for providing access to both the cosmetic receptacle and the cosmetic set receiving drawer.

2. The cosmetics case of claim 1, wherein the housing includes:

an aperture disposed on a side wall thereof for accommodating the cosmetic set receiving drawer;

biasing members disposed at a front wall of the housing for engaging with the locking and releasing member;

biasing members disposed at a side wall opposite to the aperture; and

a biasing member disposed at the rear wall for opening the cover.

3. The cosmetics case of claim 1, wherein the cover includes:

a hook groove disposed on a front center thereof;

a mirror adhered on an inside thereof; and

a connecting plate attached on a rear wall thereof, the connecting plate having a pair of pivot pin holders disposed on both ends thereof for receiving a pivot pin which is passed through an aperture of the rear wall of the housing.

4. The cosmetics case of claim 1, wherein the cosmetic receptacle includes:

a plurality of partitions for defining a plurality of compartments for accommodating various types of cosmetics.

5. The cosmetics case of claim 1, wherein the cosmetic set receiving drawer includes:

a plurality of compartments for receiving cosmetic tools.

6. The cosmetics case of claim 1, wherein the locking and releasing member includes:

a locking hook extending from the top thereof for locking with the hook groove of the cover;

a pair of elastic wedges extending from both sides thereof for engaging with the biased members of the housing; and

a key plate extending from the back portion thereof for engaging with an elongated groove of the housing, the key plate having a key projection for stopping a stopper of the cosmetic set receiving drawer.

7. A cosmetics case which comprises:

a housing having a cosmetics receiving room disposed on the top thereof;

a cover pivotally mounted to the housing, said cover having a mirror and also a hook groove disposed on the front center thereof;

an elongated chamber extending from a front wall thereof; and

a cosmetic brush adapted to be slidably received in the elongated chamber, said cosmetic brush including:

a spring disposed within the brush;

a pushing element having a locking hook for engaging with the hook groove of the cover, and a stopper for stopping the body projection thereof; and

whereby when the user pushes the pushing element, the cover releases from the locking hook of the cosmetic brush, the cover opens, and simultaneously the cosmetic brush is pushed out.

8. A cosmetic case which comprises:

a housing having a cosmetic receiving room disposed on the top thereof;

a cover pivotally mounted to the housing, said cover having a mirror and also a hook groove disposed on the front center thereof;

an elongated chamber extending from a front wall thereof; and

a cosmetic brush adapted to be slidably received in the elongated chamber, said cosmetic brush including:

a hollow chamber;

a spring disposed within the chamber, said spring being attached to a fixing element;

a pushing element attached to the spring, the pushing part having a locking groove for locking to the locking hook of the cover;

whereby when the user pushes the pushing element, the cover releases from the locking hook of the cosmetic brush, the cover opens, and simultaneously the cosmetic brush is pushed out.
